

The main building at the Northwest campus, landscaped in white last week following the area's recent snowfall.

## Presidential search committee forming

The search for the sixth president of Gallaudet College will begin Feb. 1, according to Board of Trustees Chairman Jane Bassett Spilman. To that end, a 12-member search committee is being formed.

Spilman said that the plan is to have the next president in place for the Fall of 1984.

Six members of the search committee, three deaf and three hearing, are members of Gallaudet's Board of Trustees: Harvey Corson, Robert Sanderson, Frank K. Sullivan, Charles Haskell, Alexander E. Patterson, Jr. and Rex K. Rainer.

The two members of the committee from the College faculty are Ausma Smits and Horace Reynolds. Patricia Shores will serve from the Student Body Government, of which she is the president. The representative from the

Gallaudet College Alumni Association is Leo Jacobs. The staff representative for Gallaudet was not known on Friday as *On the Green* went to press. The pre-college faculty representative also had not been named when *On the Green* went to press.

## Board of Trustees creates committee to aid in transition

by Nancy Connors

During its January meeting, the Board of Trustees of Gallaudet College established a management review committee to provide support and guidance to the interim president and vice presidents during this period of transition between presidential administrations. Four board members comprise this committee: Philip Bravin, Henry Ashforth, Rex Rainer and Oliver T. Carr. According to a statement released by Board Chairman Jane Bassett Spilman, these members will work closely with the College's management team to ensure effective administration of Gallaudet's programs.

Bravin was elected to the Board in Oct. 1981. He received a bachelor of science degree in Business Administration from Gallaudet in 1966 and is currently working as a project manager with IBM Corporation in New York.

Ashforth lives in Greenwich, CT, and was elected to the Board in May, 1982. He is president of Albert B. Ashforth, Inc. of Stamford, CT, and is a trustee for several other organizations including the New York Association for the Blind.

Rainer is director of the Center for Industrial and Applied Research at the University of Alabama-Birmingham. He is newly elected to the Board. Rainer received his doctor of philosophy in Civil Engineering from Oklahoma State University and has worked extensively as a consulting engineer.

Carr, newly elected to the Board, is president of the Oliver T. Carr Company—a real estate planning, development, leasing and management organization which specializes in commercial and mixed-use development. Carr also serves on the Board of Directors of the Greater Washington Board of Trade and other metropolitan area organizations.

The full Board of Trustees is chaired by Spilman, who was elected to the Board in 1980 and to the chairmanship in May, 1983. She is a resident of Bassett, VA, and has been active in city, county and state activities.

## Schuchman addresses faculty at first meeting of semester

by Nancy Connors

The first faculty meeting of the Spring semester will reconvene Monday, Jan. 30 to complete the business on its agenda. Issues concerning amendments in the bylaws which require a majority vote of the faculty were left suspended when Catherine Ingold, chair of the Collegiate Faculty, adjourned the Jan. 23 meeting at 6:15 p.m. A quorum was no longer present to conduct business.

The meeting began with an address to the faculty by John Schuchman, vice president for Academic Affairs. Schuchman discussed the resignation of W. Lloyd Johns as the fifth president of Gallaudet College and answered questions from faculty members about John's resignation. Johns resigned on

Jan. 20 during a full meeting of the Board of Trustees.

Schuchman requested that the faculty select two of its members to serve on the search committee for the sixth president of the College. In the meantime, he noted, Jerry C. Lee, vice president for Administration and Business, would serve as interim president.

In response to several questions posed by faculty members, Schuchman said that the Board of Trustees has instructed that projects in progress will continue as planned and that "changes will continue to occur."

"We are not returning to square one," or as things were before Johns came to campus, Schuchman affirmed. He said he will continue to work on

the reorganization of the instructional programs which brought Pre-College Programs into the area of Academic Affairs.

Schuchman went on to say that he would be meeting that evening with students and on Jan. 24 with Pre-College staff and faculty.

Returning to its agenda, the Collegiate Faculty voted on and passed two proposals brought to the floor by Ed Krest, associate professor of Mathematics and chair of Committee B—the Undergraduate Curriculum Committee. The proposals were developed in response to the committee's observation that a strict adherence to limiting study in a major field of concentration to 30 hours may impair

## Louise Perkins continues lectures, classes on campus

Computer scientist Louise Perkins, on loan to Gallaudet this academic year, will continue teaching and giving lectures this semester before returning in May to the Lawrence Livermore National Laboratory (LLNL) in Livermore, CA. LLNL is a national laboratory which deals with applied research problems.

Perkins is employed as a computer science/mathematics programmer there and came to Gallaudet last June to share her knowledge and technical expertise in the computer science field. As a visiting professor in the Department of

continued on page 2

The remains of the old Look of Sound Exhibit at Chapel Hall were torn down and cleared from the building recently. The new exhibit is located in the Edward Miner Gallaudet Building.

# Serendipity

## Library Bits & Pieces

### Foreign Videotapes

by Eileen Ford

In the past few years there has been a demand for additional videotape formats to help meet the expanding needs of the College community.

To help meet some of these needs at Gallaudet, the Individualized Learning/Media department within the Library received a Beta II videocassette recorder. As the needs expanded, a VHS player/recorder was also added. Both machines have been heavily used by faculty, staff and students for various activities such as reviewing sign language tests, student teaching methods, previewing materials for classroom use, studying programs at other schools, research in linguistics and even students getting a recorded message from mom and dad at home.

However, the need for additional options on existing equipment does not stop here. As American schools and programs were increasingly able to afford Beta and VHS equipment, so too were foreign schools and programs. However, television in many other countries does not operate on the same video system as the United States. Therefore, videotapes are not compatible. Faculty members here have found much difficulty when trying to view the videotapes from a country whose standards are different from ours. Occasionally, a faculty member might find an embassy which had playback equipment capable of accepting a particular country's videotaping standards, but more often this was not true.

Recently, we have added a specialized VHS player. It can play videotapes from other countries so that they can be viewed here. Since the new VHS's arrival, it has already been utilized

several times. Although materials can be viewed, the equipment does not have the capability of converting foreign videotapes to U.S. standards. The following is a list of some different broadcast systems and major countries that use them. They can be watched on our new VHS player. There are two drawbacks: (1) some programs can only be viewed in black and white (this is due to differing color standards in some countries) and (2) we can only play VHS videocassettes and not Beta or 3/4"-U-Matic.

#### TV Broadcast System

1. PAL (System I)
2. PAL (Systems B & G)

#### Major Countries\*

Great Britain, Hong Kong, South Africa  
Australia, Spain, Denmark, Italy, West Germany, New Zealand  
Saudi Arabia, Iraq, Iran, D.D.R.

3. MESECAM (System B & G)
4. NTSC (System M)
5. SECAM

USA, Canada, Japan  
France, USSR

\*For a more complete list of the T.V. systems used by other countries, a color coded map is available at the Individualized Learning/Media Center counter in the Library.

If you have a videotape from another country and are not sure which T.V. system it is, or would like to view it, contact Eileen Ford or Tom Harrington at x5580 (voice) or x5579 (TDD) for further information. A 24-hour advance notice is needed to set up the equipment in one of the preview rooms.

A special thanks to R. Orin Cornett for his assistance in getting us this equipment.

## Sponsored R&D

### Grant/contract deadlines

Provided below are application deadlines of selected federal programs that offer potential grant or contract opportunities for Kendall Green faculty, staff, and graduate students. More details on programs of interest can be obtained from the Office of Sponsored Research, x5030 (voice or TDD).

Deadline	Program
02/28/84	ED: Women's Educational Equity Act Program
03/01/84	NEH: Challenge Grants Program
03/01/84	NEH: Summer Seminars for College Teachers
03/01/84	NIMH: Psychotherapy of the Elderly
03/02/84	ED: Communication in Deaf Blind Children
03/05/84	ED: Handicapped Children's Model Demonstration Projects
03/16/84	ED: Student Initiated Research Projects
06/01/84	National Institute of Justice: Unsolicited Research Program

### Teacher Seminars

The National Endowment for the Humanities will offer its Summer

Seminars for College Teachers again this year. Applications are due on March 1, and announcement of awards will be made on March 20.

The summer seminars provide teachers in two-year, four-year and five-year colleges with opportunities for advanced study or research in their own fields or in other fields related to their interests.

During the eight-week sessions, participants will work under the direction of a distinguished scholar and pursue individual projects; there are twelve participants in each seminar.

College teachers selected to participate in the program will receive a \$3,000 stipend to cover travel expenses to and from the seminar location, books and other research expenses and living expenses for two full months.

College teachers who participated in NEH summer seminars in 1981 or earlier are eligible to reapply for 1984, but those who attended one of the seminars in 1982 or 1983 are not eligible.

For further information, please contact the Office of Sponsored Research or Division of Fellowships and Seminars, National Endowment for the Humanities, Room 316, Washington, DC 20506.

David Martin, an assistant professor in the Department of Education, speaks at the organizational meeting of Kappa Delta Pi on campus. Martin is the faculty advisor for the Gallaudet chapter of the honorary society.

## Honorary society organizes on campus

The Gallaudet Chapter of Kappa Delta Pi (KDP) held its organizational meeting on campus in November and will hold its next meeting next month. The purpose of the Nov. 17 meeting was to organize the membership into various committees and to discuss the upcoming installation of the chapter.

Thirty potential charter members attended the meeting. The attendees included faculty and undergraduate and graduate students from a variety of programs which prepare school personnel.

KDP is an honorary society with

chapters throughout the United States. Its membership is composed of students and faculty in programs which prepare school personnel.

The next meeting of the new chapter will be held Feb. 8, at which time the society will be officially installed as a unit of the national society and charter members will be initiated by the national vice president of Kappa Delta Pi, John Merryman of Indiana University of Pennsylvania.

For more information about KDP, contact David Martin in the Department of Education at x5400.

## Computer science lectures continue

continued from page 1

ment of Mathematics and Computer Science, Perkins has assisted in establishing the computer science curriculum here. To that end, she is teaching upper level computer science courses and is presenting lectures for faculty members.

"Mostly, we're concerned with getting and keeping a good computer science major," she says of the College's new curriculum. The computer science major was approved last spring and the Department of Mathematics changed its name to the Department of Mathematics and Computer Science.

Perkins said that because of the continual growth of the computer science field, it is important to retrain professionals in computer science and receive continuous input from industry and research. Her lectures have served to help in the retraining of Gallaudet faculty and she has participated in discussions on how to receive input from industry sources.

"It's difficult to get that kind of input at a small school, but Gallaudet has an advantage," she said. "(Gallaudet) has more to offer—it affords an experience in deafness."

She said she has enjoyed her stay on campus thus far, noting that she has "learned a lot about sign language and people in general."

In return, she has helped Gallaudet faculty and staff broaden their knowledge of computer science.

Having taught two upper level division courses last semester, Perkins will teach another two this semester.

In addition, she will continue presenting lectures, once every two weeks this semester rather than every week. Whereas last semester's lectures gave a general introduction to computer science, the lectures this semester will

address more specific topics.

The lectures will be held every other Thursday afternoon from 3 to 4:30 p.m. The location for the lectures was not decided upon at press time, but will be posted around campus.

The following is Perkins' lecture schedule this semester:

- Feb 2: The IBM personal computer.
- Feb. 16: UNIX, an operating system out of Bell Laboratories.
- March 1: Networking
- March 29: Artificial Intelligence.
- April 12: Data Base Systems.
- April 26: Parallel Processing/Data Flow Machines.

Gallaudet College is an equal opportunity employer-education institution. Programs and services offered by Gallaudet College received substantial financial support from the Department of Education.

# Among Ourselves

Cynthia C. Fernandes and Kathy Cooper of the Audiology Department had a research article published in the December 1983 edition of the *Hearing Instruments* journal. Their article was entitled "Using a Horn Mold with Severe-to-Profound Losses" and discussed research finds that many deaf persons can benefit from new earmold technology. The Libby Horn mold is available at the Audiology Clinic.

David S. Martin, a professor in the Department of Education, presented three lectures at a special invitational conference for educators held Dec. 13-16 at Oxford University in England. The conference was entitled "New Initiatives for Learners in Difficulty" and Martin's presentations there included a paper, "Strategies for the Implementation of Cognitive Education," based on his research at MSSD. In addition, Martin gave a lecture on "Balancing School Evaluation Designs in Curriculum Innovations" and participated in a panel presentation on "Current Trends and Pressures in American Teacher Education." The conference was sponsored by the Center for Educational Research and Innovation of the Organization for Economic Cooperation and Development—a 24-nation organization of industrial nations based in Paris, France.

Harriet Kaplan, an assistant professor in the Audiology Department, has had a book published. The book, entitled "Site of Lesion Testing: Audiometric Interpretation," was written by Kaplan and four others. The book was released this month.

Jo Israelson, planning specialist for Pre-College Outreach, began the process of curriculum review and adaptation with the Charles County Board of Education in La Plata, MD, at a Dec. 7 workshop. Charles County serves 40

hearing impaired and communications-disabled children through its public schools.

Daniel A. Kirby, manager of Contracts and Purchasing, recently achieved the status of certified purchasing manager. The certification is awarded by the National Association of Purchasing Managers (NAPM) in recognition of expertise in the area of procurement. Kirby, who is a member of the Washington chapter of NAPM, completed a four-part exam in order to receive the award, which places him in a select group among procurement professionals.

A paper presented by Thomas J. Landers, dean of the School of Education and Human Services, and David S. Martin, coordinator of the Undergraduate Teacher Education Program, delivered at the World Assembly at the International Council on Education for Teaching in July of 1983 has been accepted by the ERIC Clearing House on Teacher Education. The paper, "Making the Teaching Profession Accessible to the Handicapped" can be obtained from the ERIC micro-fiche collection through computer searches of the ERIC data base or in paper form.

## Graduate School colloquium Feb. 16

Susan Traiman from the National Commission on Excellence in Education will speak at the Graduate School Colloquium scheduled for Feb. 16 at 4 p.m. in the auditorium of Ely Center.

Traiman will discuss the impact of the National Commission's report, "A Nation At Risk." Her presentation will be followed by a question and answer period and an informal reception.

## Faculty to resume unfinished business

*continued from page 1*

the ability of students to meet certification and accreditation requirements. "Some accreditation bodies recommend more credit hours than the college currently permits," stated Krest.

During the discussion, one faculty member stated that the proposals would help "to maintain the promise to the students that their degrees will enable them to qualify for jobs if certification is involved."

Following the majority votes, the faculty now has the flexibility to permit some major areas of study to require more than 30 hours in that field of concentration with more than 16 hours in another related field. Committee B

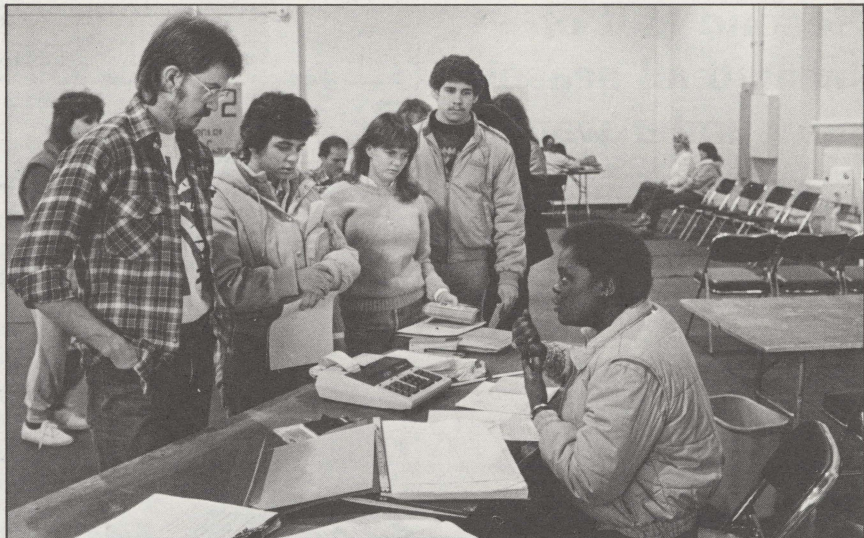

## IBM representatives to speak Feb. 7

Representatives of IBM Corporation will be on campus Feb. 7 to discuss "Career Opportunities at IBM for the Graduating College Student." The discussion will be held in the auditorium of Ely Center from 7 to 8:30 p.m.

Philip Bravin, a member of the Gallaudet Board of Trustees and an IBM

employee who graduated from Gallaudet, will be joined by other IBM representatives to discuss their corporation and opportunities within.

For more information, contact the Counseling and Placement Center at x5638. Faculty, staff and students are invited to attend the discussion, during which time refreshments will be served.

Some of the 210 students studying at the Northwest campus School of Preparatory Studies register for classes in the gymnasium Jan. 20 prior to the beginning of the semester.

## MSSD's annual music concert set

Laser lights will keep in time to student-composed music at the Model Secondary School for the Deaf's annual music concert, Friday and Saturday, Feb. 10 and 11 at 8 p.m.

Tickets are \$2 for adults, \$1 for students and can be reserved by calling 543-PLAY (voice) or x5801 (TDD).

Nightlight, a company of laser artists based in Arlington, VA, is providing creative and technical assistance in the visual interpretation of original pieces for guitar, synthesizer and drums. Students, however, will themselves direct the beams of light.

"When you think of a visual interpretation of music, lasers are just what you think of," said Karen Semanchik, communications instructor and co-director of the show.

With that in mind, she and co-director Norman Lederer, also an in-

structor in MSSD's communications department, contacted Nightlight, which volunteered to help with the concert.

"We've been out to their facility several times to familiarize the kids with the whole idea," Semanchik said. "They've really learned a lot."

In addition to the laser-accompanied student compositions, the 20 participating students will demonstrate the look of music by sign-singing to recorded music. They've chosen current hits, such as Michael Jackson's "Thriller," the Flashdance theme "Oh, What a Feeling," and "Memories," from the Broadway musical, *Cats*.

All students in the concert are active members of the school's Music Club, which Semanchik said started truly as a response to students' interest in music. Music is also part of the MSSD communications curriculum.

## Management review committee created

*continued from page 1*

According to the bylaws, the Board may be comprised of 21 voting members, three of whom are to be public members of the Board. Congressman David Bonior (D-MI) and Ronald Packard (R-CA) currently serve as public members. Vice President of the United States George Bush will appoint the Senate representative to the Board.

The other members of the Board are:

- Katie Brown, a graduate of Gallaudet College working as a counselor with the Jewish Vocational Service in Chicago;
- Harvey Corson, a graduate and former instructor at Gallaudet currently serving as superintendent of the Louisiana School for the Deaf;
- Charles Haskell, associate publisher of the *Mt. Sterling (KY) Advocate* and vice president of Hasco Newspaper, Inc.;
- James Hicks, M.D., chairman and professor of the Section of Otolaryngology in the Department of Surgery at the University of Alabama Medical Center;
- George E. Muth, who has served on the board since 1952 and is an executive with a Washington area art and drafting supply company;
- Alexander Patterson, Jr., who lives in Greenwich, CT, and became presi-

dent of GTE Information Systems, Inc. in 1973;

- Gustave Rathe, Jr., director of education, Data Processing Division with IBM and a member of the Advisory Board of the National Technical Institute for the Deaf;
- Vincent Reed, vice president for Communications with the Washington Post who also chairs the Annual Business Campaign for Gallaudet;
- Robert Sanderson, coordinator of Services to the Deaf for the Utah State Board of Education Office of Rehabilitation Services;
- Philip M. Sprinkle, M.D., professor and chair of the Division of Otolaryngology at the West Virginia Medical Center in Morgantown, WV;
- Frank Sullivan, fraternal president of the National Grand Society of the Deaf who has served on the Board since 1965; and
- Eloise Thornberry, the widow of the Honorable Homer Thornberry who served on the Board from 1949 until 1964. She is the daughter-in-law of Mary L. Thornberry, a former teacher at the Texas School for the Deaf and mother of the Congressman.

There are currently two vacancies on the Board, including the Senate public member. Lillian Holt, supervisor of Office Services in the Office of the President serves as liaison for the Board and the College.

## Second half of basketball season now under way

In more than one way, the women's basketball team began the second half of the season on a discouraging note. The Bisonettes lost to powerful Messiah College 67 to 41 on Jan. 17. The women then made a trip to chilly Rhode Island where the temperature was about minus 10 degrees to play against Roger Williams College and Rhode Island College on Jan. 20 and 21.

The Bisonettes defeated Roger Williams 55 to 51 but lost to Rhode Island 78 to 60. Overall, the women's basketball team has a 9-3 record. Based on statistics prior to the Messiah game, the Bisonettes are ranked in the top 10 in four categories in the NCAA Division III College basketball statistics.

The team is ranked eighth in scoring offense, averaging 79.3 points per game, and seventh in defense, holding its opponents to an average of 47.8 points per game. This represents a scoring margin of 31.6 points-good for fourth place nationally. The Bisonettes are ranked third in field goal percentage—hitting the hoop 51 percent of the time. Wilkes College in Pennsylvania is the leader with an incredible 71.8 percent field goal shooting.

Bisonettes head coach Kitty Baldrige is pleased with the team's effort but will sorely miss leading scorer Sara Wummer who is ranked twelfth in the nation with an average of 21 points per game. "Sara suffered a dislocated shoulder before the semester break and it doesn't look like she'll be playing for the rest of the season," Baldrige said. The Bisonettes will play at home Jan. 31 and Feb. 2 at 7 p.m.

Meanwhile, the men's basketball team is looking for its first win of the second semester after suffering three defeats. The Bison lost 38 to 32 in a slowdown game to Washington Bible, to Bluefield College 76 to 55 and to Philadelphia Pharmacy 82 to 62. The men's team has a 4-9 overall record as of Jan. 21. The next home game for the Bison is Feb. 6 at 7 p.m.

## Interpreting service offers varied assistance

Gallaudet Interpreting Services has a staff of four full-time and two contract interpreters and calls upon the services of freelance interpreters to meet the needs of the campus community. Services performed by GIS include interpreting Gallaudet-sponsored activities both on and off campus, interpreting telephone calls for faculty and staff, interpreting for graduate students taking a course at one of the member Consortium colleges and translating texts, developing English scripts and doing voice-overs for videotapes produced by the Gallaudet TV studio.

Agencies such as Sign Language Associates and Deaf Pride provide interpreting services for community referral or personal use while GIS functions to serve campus needs.

Marie Taccogna is the coordinator of Gallaudet Interpreting Services. The number for GIS is x5634 (voice) and x5554 (TDD). To request GIS services for short-term on-campus assignments, please call one week in advance; for long-term and off-campus assignments, two weeks in advance. Out-of-state assignments require three weeks notice.

Mike Rosenbaum, coach of the men's basketball team at Gallaudet, goes over some strategy with team members during a recent Bison home game.

## Inclement weather policy, procedures

In order to help clarify policies and procedures in effect during inclement weather, the College's inclement weather policy is printed below, along with shuttle schedules used during inclement weather.

### Policy:

The College recognizes the difficulties faced by employees commuting to work during severe inclement weather. However, due to its large residential component, the College is unable to totally suspend operations. If it should be necessary to close or alter operations at Gallaudet because of adverse weather conditions, the following procedures will therefore apply.

### Procedures:

I. All faculty and staff are expected to report to work unless Gallaudet College in its entirety is announced "closed." In the event that MSSD and KDES only are announced "closed," this indicates that they are closed for students. In such instances, all faculty and staff are expected to work.

II. A decision to close Gallaudet College can be made only by the president. Announcements will be made on local radio and television stations. Telephone procedures may be established within each unit or division. However, it is the employee's responsibility to ascertain by some method whether the College is closed.

III. In the event that the College is officially closed due to weather conditions, College and Pre-College faculty will make up days as scheduled in the school calendar. Staff will be granted administrative leave for such absences.

IV. The appropriate vice president will ensure that faculty contracts are fulfilled with respect to the number of days worked. Any days or classes missed due to inclement weather will be rescheduled.

V. During periods of inclement weather that result in an official College closing, all essential service personnel are expected to report to work. Essential employees include:

1. Department of Safety and Security Personnel
2. Utility Plant Personnel
3. Grounds Crew
4. Payroll and Bank Personnel, when necessary to meet payroll schedule
5. Repair and Maintenance Personnel who perform emergency repairs. Such individuals will be notified in advance by the director of Maintenance and

Operations or the manager of Building Maintenance Services

6. Nurses and Doctors

7. Resident Advisors, Resident Assistant and Head Residents

Unless precluded by collective bargaining agreements, essential personnel will receive eight hours of compensatory time off for each day that the College is officially closed. Overtime will be paid according to applicable collective bargaining agreements or College policy. Official College closings are not considered holidays for any purpose. Compensatory time off will not be granted to those who reside on campus and are therefore not affected by transportation or road conditions.

VI. In certain inclement weather situations, administrative leave may be extended to staff and faculty employees, either for late arrival or early departure, as determined by the president. Those staff personnel who do not report to work due to inclement weather when no closings have been announced must use annual leave or leave without pay for all work hours that are missed.

When late arrival procedures are announced, employees are still expected to arrive at work as close as possible to their normal starting time. Supervisors may deny administrative leave to subordinates who have not made a reasonable attempt to get to work. Criteria to be used in making such a decision will include distance between the employee's home and Gallaudet and the success other employees similarly situated had in being able to report to work.

### Shuttle service

The Transportation Department will begin all shuttle service one-half hour after receiving word from the Office of the President that the College is closing early. Shuttle service will continue for approximately one and one-half hours beyond the official closing time, depending on road and weather conditions. There will be no individualized service for those shuttle passengers electing to remain on campus for their normal working hours or who have inflexible connecting schedules with other transportation systems which prohibit early departures.

Questions regarding early dismissals should be directed to the appropriate administrator in charge of your area and not to the Transportation Department.

## Barbara Walters' special captioned

The Barbara Walters Special, scheduled for airing on Monday, Feb. 6, will be closed captioned. ABC-TV will caption the hour-long program to be broadcast at 10 p.m.

Last November, ABC-TV captioned a Barbara Walters special in which she interviewed Johnny Carson, Johnny Cash and Walter Cronkite.

Specifics on the new upcoming special were not available as *On the Green* went to press.

## Jobs Available

Some of the advertised staff positions may already be filled. For updated information, call the JOB RECORDING in the Personnel Office, x5514 or x5520 TDD.

SECRETARIAL POSITIONS: Contact Personnel for listing.
